

Do not install a large size parasol when strong winds occur, as it will break off easily.

You can swivel the SunDivan chair 360 degrees to face the sunshine at all times of the day. In order to swivel, release the turning mechanism underneath the chair with the 'release-and-stop' handle. This makes the chair turn in steps of 45 degrees or, if wanted, continuously. In order to handle this mechanism, you must kneel next to the SunDivan or bend forwards and turn it with one hand. The handle has been placed far away from children's hands.

If you want to move the heavy chair, please be advised it needs a least two healthy and rather strong grown ups to move it. Do not move this product alone or if you have heart problems or any other serious health issues (e.g. back problems). The chair weighs about 275 Pounds and is not easy to lift in one piece. As a solution the chair can be dismantled into 2 pieces: 'the foot' and 'the bed'. See the picture: You need to unscrew the 4 screws on top of the foot, see the picture where 2 out of 4 are visible at the red arrows. The other two are on the other side. Once completely removed, the wooden bed can be released from the metal foot.

Day-to-day treatment

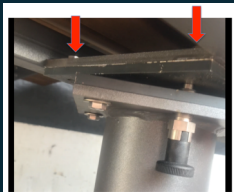

Of course your SunDivan can get dirty over time due to dust and other factors from being outside. Normal cleaning can be done with a soft cloth and water. When you see very tiny little scratches or dents on the surface of the wood, dab some sparkling (!) water on the surface and leave it for a few hours. You will be amazed how well the wood recovers from these small imperfections!

With the use of clean water the original smell of Kebony is also brought back temporarily. Most people really appreciate this specific smell.

In sum, your chair does not require a lot of regular treatment ...

The don't with SunDivan chairs

- Do not use a high water pressure washer on the wood. It will damage the structure of the wooden surface irreversibly.
- Do not oil the metal parts. They don't need that and it will do more harm than good.
- Don't leave the cushion overnight on your chair. Mold may appear between the cushion and chair, even if the nights are dry and warm.
- Don't use a plastic cover or BBQ-style cover over your chair. Again, mold may build up.
- Do not sit with two adults on the far foot-end. Your chair may tip!
- Keep children away from the chair as they can swivel and rock the chair in a playful way and harm themselves

Dismantle the foot from the bed ...

Unscrew 4 screws completely and lift the bed from the foot.

Warranty

This warranty is valid for the original buyer only and also includes normal use and proper maintenance of the SunDivan product. Misuse and/or bad maintenance of the product voids all warranty.

This warranty is a manufacturer's warranty, but your first point of contact is the importer, Luxury Leisure L.L.C., who will execute and respect this warranty OR your local retailer where you bought the product. Keep your invoice and this warranty document at all times. Most people nowadays take pictures of these documents and store them digitally. This is a good way to show us you are the original buyer and we can check the date of purchase.

Upon delivery, you will be asked to check the SunDivan and all of its add-ons on damages and flaws. You will be asked to sign for proper delivery and installment. After that, no claim can be made the products you received came in bad order. If allowed, pictures will be taken for good understanding of delivery and installment of the chaise lounge.

The basic, legally required product warranty of the entire product and add-ons is 1 year (12 months after the date of delivery).

Upon delivery, you will be asked to check the SunDivan and all of its add-ons on damages and flaws. You will be asked to sign for proper delivery and installment. After that, no claim can be made the products you received came in bad order. If allowed, pictures will be taken for good understanding of delivery and installment of the chaise lounge. It's a good way to see how we delivered your product in good order and you were satisfied the day we brought it to you.

The basic, legally required product warranty of the entire product and add-ons is 1 year (12 months after the date of delivery).

In the event a defect is found after purchase and proper delivery, we will always ask you for proof (by means of pictures or video footage). In case of a true defect, the importer or local retailer will repair and/or replace the defective item, at its discretion.

The manufacturer also gives 3 years warranty on the 360 degrees turnable foot (36 months after the date of delivery). This means we will replace the foot if it malfunctions within 3 years, free of charge. All you need to do is contact your retailer or us and show us the defected foot and we will replace it for you and discard the defect foot.

The supplier of the Kebony wood, Kebony Norge AS, guarantees 30 years (so 360 months after the date of delivery!) replacement of wooden bars on the SunDivan product, free of charge if one of the bars would show signs of wood rot without fault of the buyer. It does not apply to dents or scratches on the surface or suspected misuse by the customer. A special document about this 30 years warranty will be given to each buyer to go into more details.

SunDivan
...relax, enjoy, revive

As a matter of fact; you don't need to do anything to maintain the quality of your SunDivan! Kebony has a deep brown color that will turn to a silver-grey patina over time though. The speed of this greying process depends on the intensity of exposure to sun and rain (a year or 2').

The original brown color can be maintained though using UV protection oils on a regular basis. Proper UV protection oils can be obtained at your dealer or at any Home Depot or other DIY store. Ask for Kebony wood protection oil specifically! We recommend GoldenOil Exterior from Diotrol and can be obtained at Luxury Leisure L.L.C.

Other brands to use are Penofin, Sikkens and Sansin, natural light penetrating oils or stains.

Please do not use latex paints or film forming finishes! Be aware Kebony wood is water resistant and in order to keep it that way little oil is recommended. When you treat your Kebony wood with (Diotrol) UV protection oil, please remove all abundant oils on the surface after 30 minutes with a solid cloth.

If you ever have any questions how to treat Kebony wood, feel free to call or mail us!

First use and installment

If you want the SunDivan chair to be on your decorative (cobble) stones, tiles or any hard surface and you don't want the metal to scratch those stones, please put some heavy-duty coasters underneath the metal round base. Different versions exist and some can be stuck to the metal and hard to remove, others are loose and therefore easy to remove. Such coasters are not included though. Some people also put a small piece of old blanket underneath the SunDivan to protect their tiles.

SunDivan chairs can be placed on grass or earth soil as well. Please bear in mind though the chair is heavy and will sink an inch or two deep before resting solidly. Some people use this knowledge to have the grass removed before installment and laying the grass over the foot of the chair. In a few days, the grass will naturally grow together again, the chair lowers itself into position and the chair will remain put at that specific location with an invisible foot. If you intent to move the chair from time to time on grassland though, please be aware the grass underneath the SunDivan chair will be dead and needs intense revival or even renewal ...

Your chair can be equipped with a parasol holder on the side and is suitable for any custom parasol with a pole diameter up to 1,18 Inch (30 millimeters).

SunDivan, your high end chaise lounge

Congratulations on acquiring your personal SunDivan chaise lounge! You have obtained one of the most sustainable furniture pieces ever created for (outdoor) relaxation and recuperation. Relax, enjoy and revive ...

You have chosen the Kebony Clear version of the SunDivan.

In order to enjoy this concept for decades, please allow us to explain more about the hardwood choice of Kebony and its characteristics.

Developed in Norway, the Kebony technology is an environmentally friendly, patented process, which enhances the properties of sustainable softwood with a bio-based liquid. The process permanently modifies the cell walls giving Kebony premium hardwood characteristics. On the scale of Janka the hardness of Kebony Clear wood is 1,618 lbf, while for example teak has a significantly lower hardness of 1,070 lbf.

Wood species	Durability 1=best EN 350	Hardness Janka (lbf)	Swelling Dry to wet in tangential direction (%)
Ipe	1	3510	6
Kebony Clear RAP	1	1618	4
Teak	1	1070	3 - 4
Thermo Ash	1 - 2	900	5
Kebony Character	1 - 2*	630	6
Thermo Pine	2	600	4
Western Red Cedar	2 - 3	350	5

Recognized as a Technology Pioneer by the World Economic Forum and listed as Global Cleantech 100, Kebony has been embraced by leading international architects and developers, which are served through a global sales and distribution network.

Kebony wood has no harmful effects on the environment. Production of Kebony is based on a liquid extracted from bio-waste and the factory of our supplier produces to the most environmentally friendly standards. In the waste disposal phase, Kebony can be treated as regular, untreated wood. It can also be brought back to your supplier if you wish to do so.

The raw materials for Kebony are acquired from commercially managed forests with large timber harvests in Chili and/or New Zealand. Our Kebony supplier holds certificates guaranteeing the origin of their timber and can be requested upon.

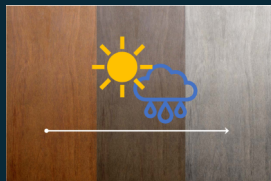

For the SunDivan chaise lounge we use Kebony Clear wood, which means the wood is produced from FSC®-certified Pinus Radiata and free of (big) knots. All 30 bars have a clear front surface and are treated through the board. On the backside of the bars an occasional knot may appear. Also color differences may appear based on the original color of the wood and must be considered natural and unavoidable.

How to treat your SunDivan for optimal use and longevity

Kebony wood was chosen as an optimal solution in the demand-triangle of longevity, low maintenance and excellence in appearance ...

Part of a bigger family ...

As part of Kebony's commitment to corporate social responsibility, they participate in these global initiatives:

Weathering on Kebony Clear wood

As time goes by, Kebony Clear wood turns from brown to patina grey ...

Release-and-stop-handle

The handle for turning 360 degrees: current position is STOP. In order to release, pull down and shift sideways and let go.
